Empty / Charged

Humans as expeditious, social beings run out of energy from time to time. We need to find the time to take a few steps back to charge our batteries. We invite all people whose batteries have run out of energy to charge themselves on our lounge chair. Chair holds three different positions: empty, charging and full battery.

Rest explores the mutual influence between the user and object, with reducing the void between both through its use. With REST modular shelf, we give user an opportunity to design their own product by moving the tiles on the structure as needed. The purpose of composite tiles is to arouse emotions and curiosity in the user by giving them opportunity to find the aim and function for given materials.

Coma

Coma tries to solve the ongoing battle with textile waste, helping with more efficient recycling and sorting. It uses discarded plastic from construction sites as outer shell and textile waste as inner cushion. It's water resistant so it can be washed and cleaned and used for sitting.

Tühi / Empty

Pallas' textile and
furniture department
collaboration project

Pallas University of
Applied Sciences

Tühi/ Empty

Project Tühi/ Empty is a collaborative project, where both textile and furniture students are challenged to create one of a kind product embracing both fields' know-how. All the products are made out of waste materials and created with zero waste mentality.

Traadistick

Traadistick is a clothing rack which in symbiosis with delicate wire, wooden sticks and vigorous boulder creates an optically fragile illusion. A cool sculptural element and statement piece for a showroom, an atelier, a fair or your home. Product is made from natural upcycled materials. The wireplate is created using multiweave weaving technique.

Untangle

Untangle is an armchair with a soft and mossy hand-tufted cover on which to unravel your thoughts. In addition to its seating function, UNTANGLE offers therapeutic benefits to those who need it. Sensory activity (observation, touching) helps relieve anxiety, focus, stay active, get in touch with your own body and stay in the moment. Modules can be combined in various ways, giving the product playfulness and multi-functionality.

Multishelf

Multishelf is a modern interior object that combines the function of a table, shelf and a seat. It stays together without the use of nails, screws or glue and is easy to assemble for anyone. The multiweave technology studied within the project allows to place the element woven of bootlaces to different positions depending on the desire.
